Subject: Portland Harbor Superfund Comments

The quality of materials provided were well done and provided a greater understanding of the subject as well as defining the process and how the comments are an important part to formulate the best course of action. I had difficulty hearing the speaker at the July 20, 6:00PM presentation and would have appreciated a better presentation/explanation as I am not sure that the speaker contributed to my understanding in any significant way. I found it interesting with the number of employees available from the EPA that all were women and wonder if that represents the makeup of the EPA or was chosen for a particular reason. Perhaps more could be done in the future to provide a more in-depth presentation for those that are interested.

Thank you,
